## **DETAILED ACTION**

1. This communication is in response to application's amendment dated 12/26/2006. The amended claims 1 and 18 have been entered.

## Response to Arguments

2. Applicant's arguments with respect to claims 1 and 18 have been fully considered and are persuasive. The acoustic to non-acoustic conversion disclosed by Kyle et al. is performed in the acoustic probe 32, which is conveyed on the wireline 34 through the tubular string 14. Therefore, the acoustic probe 32 is not fixedly interconnected as a part of the tubing structure as claimed in claims 1 and 18. The rejections of claims 1 and 18 have been withdrawn.

## Allowable Subject Matter

3. Claims 1-44 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 1 and 18, the prior arts of record fail to teach or disclose a borehole communication system as claimed in claims 1 and 18, which comprises converting the acoustically transmitted signal to a non-acoustic signal at a tubing structure location below the well structure, the acoustic to non-acoustic conversion being performed in a signal converter which is fixedly interconnected as part of the tubing structure (so that when acoustic signal is transmitted upwardly through the

tubing to a conversion point therein downhole of the hanger structure, at which the acoustic signals are converted to a non-acoustic form, and then the converted signal is transmitted to a signal receiving location uphole from the hanger structure. In this manner, the undesirable acoustic attenuation properties of the hanger structure do not adversely affect the quality and strength of the well parameter signals ultimately reaching the signal receiving location).

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hung Q. Dang whose telephone number is (571) 272-3069. The examiner can normally be reached on 9:30AM-6PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel Wu can be reached on (571) 272-2964. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
